Flightline is the world leader in designing and supplying advanced and legacy receivers and test sets for anti-submarine warfare (ASW). We also supply a range of gyroscopes and cockpit indicators used in fixed wing aircraft and military and civil helicopters. Our 30-year record of delivering on our commitments ensures maximum benefit with minimum risk. While our variety of products is broad, we specialize in developing a technological edge in each niche market we serve. Each new technology builds upon the experience and value of its predecessor, while being adapted to empower you to control where innovation takes you.
